

SHUBHAM SAKHARE

SDET / TEST AUTOMATION ENGINEER

Pune, India | 9637835053 | shubhamsakhare6893@gmail.com | [linkedin.com/in/shubham-sakhare](https://www.linkedin.com/in/shubham-sakhare)

PROFESSIONAL SUMMARY

Software Development Engineer in Test (SDET) with 3+ years of experience in test automation, framework development, and CI/CD pipeline integration. Skilled in web and API automation testing using Selenium WebDriver, Playwright, and Postman, with proven success designing and maintaining scalable, reusable automation frameworks. Experienced in functional, regression, and cross-browser testing, and in improving software quality through automated testing solutions. Proficient in test case design, defect tracking, API validation, and continuous integration practices that support high-quality, on-time software delivery in Agile environments.

TECHNICAL SKILLS

- **Programming Languages:** Core Java, TypeScript, Python
- **Test Automation Tools:** Selenium WebDriver, Playwright
- **API Testing Tools:** Postman, Rest Assured
- **Automation Frameworks:** Data-Driven, Hybrid, Page Object Model (POM), Cucumber (BDD)
- **Testing Types:** Functional, Regression, Smoke, Sanity, Integration, System, UI, API, Cross-Browser, End-to-End (E2E), User Acceptance Testing (UAT)
- **CI/CD Tools:** Jenkins, GitHub Actions
- **Version Control:** Git, GitHub
- **Bug & Test Management Tools:** Jira, Xray
- **Database:** MySQL
- **Methodologies:** Agile Scrum, SDLC, STLC
- **AI Tools & Productivity:** Claude AI, GitHub Copilot, Playwright MCP

PROFESSIONAL EXPERIENCE

Software Test Engineer

Canwill Technologies, Pune | June 2023 – Present

- Developed and maintained scalable UI automation frameworks using **Selenium WebDriver, Java, and Playwright** with **TypeScript**, following the **Page Object Model (POM)** design pattern and reusable coding practices.
- Designed and executed **functional, regression, smoke, sanity, integration, and cross-browser testing** for web applications across multiple environments.
- Automated critical **end-to-end business workflows**, increasing test coverage and reducing repetitive manual testing effort by approximately **80%**.
- Created and maintained **test cases, test scenarios, test plans, and test reports** based on business and functional requirements.
- Performed **API testing using Postman and Rest Assured**, including request/response validation, status-code verification, and data validation.
- Integrated automation suites with **Jenkins and GitHub Actions** for continuous integration and faster regression feedback, and developed reusable utilities to improve framework maintainability.
- Collaborated in an **Agile Scrum** environment with developers and QA teams, managing defects through **Jira and Xray**, and contributed to an approximately **45% improvement** in QA team productivity.

Software Test Engineer (Intern)

Cubic Pod Inc Software Solutions, Pune | Jan 2023 – June 2023

- Performed **manual testing** of web applications based on functional and business requirements.
- Designed and executed **test cases and test scenarios** covering functional, regression, smoke, and sanity testing.
- Prepared and maintained **test data, test execution reports, and testing documentation** for release validation.
- Identified, documented, and tracked **software defects using Jira**, including clear reproduction steps and supporting details.
- Performed **defect retesting and regression testing** to verify fixes and ensure existing functionality remained stable.
- Collaborated with **developers and QA team members** during defect analysis, bug verification, and sprint testing activities.

EDUCATION

Bachelor of Engineering Aug 2019 – May 2022
